PROFESSIONAL EXPERIENCE

Associate Full Stack Developer & Automation Engineer

Sep 2025 – Present

Blutech Consulting · Islamabad, Pakistan

- Delivering enterprise P&L Forecasting Dashboard for STC Bahrain (Saudi Telecom) — React + Redux + TypeScript + Node.js + SQL Server, LDAP/Active Directory auth, RBAC for 500+ production users across Consumer, Business, Wholesale, and STC Pay segments.
- Integrating with a PySpark-based forecasting pipeline processing 2,000+ revenue driver datasets from the Hive/Kudu data lake; managing cross-subnet firewall and SMTP configuration on Windows VM.
- Building Power Apps, Power Automate workflows, and Power BI dashboards with Dataverse for real-time financial reporting, budget approvals, and business process automation.

Full Stack Developer Intern

May 2025 – Aug 2025

Blutech Consulting · Islamabad, Pakistan

- Developed responsive full stack applications using React.js, Node.js, Express.js, and MongoDB; optimized queries and delivered new features under senior developer guidance.

Artificial Intelligence Intern

Feb 2021 – Mar 2021

Trumeridian Pvt Ltd · Pakistan

- Built and trained ML models using TensorFlow; performed statistical analysis to support AI project decisions.

Data Science Intern

Jun 2019 – Apr 2020

AI Mahdi Fast Technologies · Techveria · Fast Biz Solution

- Built data visualizations with Matplotlib, Seaborn, Plotly, and Tableau; applied Pandas/NumPy for manipulation and communicated ML insights with cost-benefit analysis to non-technical stakeholders.

KEY PROJECTS

STC Bahrain — P&L Forecasting Dashboard · [React](#) · [TypeScript](#) · [Redux](#) · [Node.js](#) · [SQL Server](#) · [LDAP](#)

- Full-scale enterprise finance dashboard for STC Bahrain — 12-month P&L calendar view with historical actuals and future forecasts across 4 business segments; forecast submission and approval state machine (Draft → Submitted → Approved/Returned).
- Node.js/Express + SQL Server backend with Active Directory/LDAP auth, RBAC per segment, and PySpark pipeline integration processing 2,000+ revenue datasets from Hive/Kudu data lake.

Smart Guest Hotel System · [Node.js](#) · [Express.js](#) · [SQLite](#) · [HTML/CSS/JS](#) · github.com/muhammadshakoor/smart-guest-hotel

- Role-based hotel management system (Guest · Staff · Admin) with full booking lifecycle state machine, service request management with staff assignment, admin analytics dashboard, and bcrypt + session-based auth. DB normalised to 3NF.

Full Stack CRUD App — Live on Vercel · [React](#) · [TypeScript](#) · [Node.js](#) · [PostgreSQL](#) · [Neon](#) · crud-app-drab-ten.vercel.app

- Type-safe React + TypeScript frontend (Vite + Tailwind), RESTful Express API with clean MVC architecture, PostgreSQL on Neon serverless — monorepo deployed as a single unit on Vercel with independent frontend/backend repos also available.

NIH Chest X-ray Classification · [Python](#) · [TensorFlow](#) · [Keras](#) · [Docker](#) · github.com/muhammadshakoor/NIH-Chest-X-rays-Classification

- Multi-label classification of 14 thorax diseases across 100,000+ images; compared 6 CNN architectures (VGG19, ResNet, MobileNet, InceptionV3, Inception ResNetV2, NASNet) — achieved 88%+ binary accuracy, surpassing the 2017 NIH benchmark. IoT deployment on NVIDIA TX2 using lightweight MobileNet.

MNIST CNN & KITTI Object Detection · [Python](#) · [TensorFlow](#) · [Keras](#) · [Faster R-CNN](#)

- Compared 5 CNN architectures on MNIST digit recognition; fine-tuned pre-trained Faster R-CNN on KITTI dataset to detect Cars, Pedestrians, and Cyclists in real driving footage with documented precision/recall analysis.

Project Budgeting App · [Power Apps](#) · [Power Automate](#) · [Power BI](#) · [Dataverse](#)

- End-to-end budgeting system with automated multi-step approval workflows, cost and resource tracking, and Power BI dashboards for real-time profitability and forecast reporting.
